Mach of the uptra cheetly and develon of our Releves Cardinal has peer title the reading of Metods. The Augustinion along with many other groups within the artelaction have good cosmo in meetin his cosmey. We cannot belie but these time same a give as the will be more than a memory to the carnot belief but these time same as the action will be more than a memory. He understood us, wer profetors, and our meets too well to become just a receptory. He will be now what he wood when ovolendy emong us a handly father, an entersected friend, a steaton's persons process.

As not Augustiane brother had a favorite suring which became a ayer attored over and over upsix: "What a friend we have in Jesus." As we conferentiate the opening of our new Augustician Seminary, and as we originate the formateld on the Augustician Order to statel more echools, and as we imperfully gray that the Division Shupterd with these and Order with fruitful vocations can be expect new light and recover strength PHIEND WE HAVE IN OUR SELECTED CARDINAL STRITCH

During the last two years. I have had the distinct pleasure of serving a consultant in beauty, quidance and counseling at Mendel Carbaile High School, I would have to sell you about any of my most vivid impress

Perhaps the primar or one why I was attracted to Mendel was to the anester of Augustain Fathers from Mendel who w a working advanced degrees in Cathell satisfactions of higher learning, its has also been an indication of proteon-mailion in treaking and having used the general satisfaction of proteon-mailion in treaking and having used the general satisfactions. and excellence of the Associations who were products as look in the chance at De Paul University. I was determined to bearn sebest the athacts in which they haught. This is how I happened to come to Mendel. There are a number of thirtys that I have noticed. First of all, there is an adventurous adventional spirit among the prioris at Mendal, firing true

sees of St. Augusting, they are ever ready to design from traditional rection. slogy is matters of edeninistration and feaching. Doe finds no stagnation here. Supplemented by a capable and strong force of lay backers. Mandel's such is second to nece.

Secondly, I was delighted to note the administrative organization which

a characterized by the decentralization of the office of the sector. In a acknot as large as Mendel. If is desirable to have assistant principals each responsi-ble for a specific aspect of administration. This is the most desirable form of school operation. No one individual can be an expert in all areas of school work. Hence the appointment of vice rectors at Mendel who have become smorts in their particular lobs (by Father Cavaraush)

tirestion of Fr. Varstynes, Dean of Studies is being reviewed as one of the outstanding educational achievements of any Catholic High School in the country. The guidance implication of such a program is apparent when we study the opinions of the principals of the schools which participated. brings us to the topic of greatest interest to men the guid program. Although excitance as an organized ecogram is schools is a re-Intively new linewation, most high athesis here seems loom of guidance service. Mendat, however, hist gone loyened the posgram of the average achesi by appointing Pt. John McMahle, a vier rector, in carrage of guidance. this has led to the unindishment of an excellent, workable program of benefit to every Mondel man and his parents.

In closing, let me say that Mendel is most certainly not a one sided hool noted only for echilership, for its guidence program, its discipline in athletic program, for its spiritual nature, or for the wide range of it corricular otherage but for all these many facest. This is trait a great other and I are very happy and proud to have been affiliated with it.

### Scrutinize, Ye Readers

Reading the Mendelian, or my other newspaper requires more than just looking at a headline to get the story. You must read all of a story to got the facts and information beneath a headline; do it with this issue. An eight page edition not only envolves a lot of work, but carries with it more news, features, sports, and special articles written especially fee you.

### Seniors, Looking for That Summer Job Yet? This summer many of the graduating seniors will be looking for

resplayment. If you are thinking about gesting a summer job, but don't know where to start or what to look for, here are some suggestions. Whatever your reason for wanting to work, you will find that there

are many summer jobs available. In a pumphlet, Summer John for Studestr. the U. S. Department of Labor mentions some of the openings bearing decompositions advertisated that you may fill during the summer. They range from jobs on securit, work at actial service agencies, farming, to jobs as factory operative, A common quantum is, "How will a remner job belo my future

It can help you if you choose a job that is in the field that you think your vocation will be in, with consideration for financial needs. This should be an important consideration in choosing employment.

Now is the time to start making application for the 3th you want. Contrary to popular belief, it doesn't take a friend on the much to get you a job, but it does take an early application. Because of the May graduation three for seniors, you will be a jump ahead of the public wheel

Preliminary information about the particular job you have in mind. the qualifications it requires, and the labor laws that might apply to it can be obtained from the school Guidance Office or school library.

### Against Capital Punishment

Caryl Chessess is dead. And capital purchasent is dying. Of the last, I am glad. My only regrets are that Caryl Cheuman be cares a public hero and that the United States loss much pressige abroad because of his execution. But these are more trivials, in: Occurren's death by neison gas in a California prison may well mark the legitting of the and of capital punishment in the United Searce.

Capital punishment is the most anachronistic renormed of middleagal justice remaining in our society under, it simply does not belong.

I am not argoing that the state does not have the right to administer the supreme penalty. It does I do affices, however, that the stare is using this right warrous reason.

Fear of capital punishment does not discourage crime; stars that have abolished the death possity found that their crime case subsequently dropped. And, of course, we must always face up to the inevisable fact error can occur; science has found many ways of taking life, but not one for bringing it back.

"It goes like this . . ." Fr. LaFlour, O.S.A., seems to be saying to Regis as he performs an experiment in organic distillation, Regis, a chemistry impor, speeds several hours a week in Tolentine's modern, wellequipped chemistry lab.

Where does an Augustinian come from? Does he hatch, or just suddenly appear? I don't care to reveal my past life, but I can tell you that just a few years ago I was standing in the same shoes (figuratively speaking) that you are

pounding up and down the halls of Mendel. And now I'm pounding up and down the balls of Tolentine. You alroady know what goes on at Mendel: so here's a brief rundown on what goes on at Tolentine.

First, just what runs up and down the halls? Seminarians. And what kind of creatures are seminarians? Well, seminarians are the men who would be senators, doctors, policemen, lawyers, ball players, or sanitary engineers had not God chosen otherwise. Look around at you. classmates. Notice all the different

types? The same goes here, except that we've all got the same goalthe priesthood.

Now let's run through a day in the life of a seminarian-me. You'll notice my smiling face (maybe not always smiling because one has to be serious sometimes) in the pictures which accompany this article. They were taken by the "Mendelian" stall on Thursday. Here's how that day went. It started with a bell at fiv -twenty-five. Twenty minutes later I was down in chanel for the start of the Divine Office. Since the Office takes about two hours in all, we don't say it all at once It's broken up into three divisions day: we assemble before breakfast, before dinner, and by appropriation is

I was told to report with the other Mendel Alumni to the front office to be interviewed ly the "Mendelian" staff. I know from last year they wanted one if us to write an article, and I hate work, so I tried to arrive a little ate; but my timing was off, as you can see from this article. However, their timing was excellent. They arrived just in time for dinser. After dinner ended, about one o'clock, we spent a few minutes

At one-thirty we have a short study period, followed by Divine Affice, but one day a week my afternoon is spent in the chemistry aboratory-and this happened to be that day. So while everyone ise removed outside for the afternoon recreation period, the chemstry students were busy breaking test tubes. This afternoon recretion period a compulsory for everyone not having class. We play chatever sport the season dictates; hockey, tennis, football, basketsall, baseball and so on. And don't think that we don't get a workut. Sports in a seminary are brutal affairs, It's surprising how felowa who look to holy in habits (like myself), can be absolute manias on the playing field. ### The Rector on Vocations

Door Mandel Man-

I wish to congrutulate the Moderator, Father Hartigan, and the Staff of the Mendellan for this issue which is dedicated to vocations. I think it is very complimentary to a high school that its student body without any provocation should show such interest in the life-line of the church, namely, its vocations,

Christ tells us that, "many are called but few are chosen". Still, the "many" can be instruments for God's Grace, according to the plans of Divine Providence, for the "few" who are chosen for a religious vocation. For instance, from the homes of ideal Catholic parents, vocations prosper; the example set by religious teachers in our Catholic schools engenders vocations; and even the sense of dedication that is evidenced in our Catholic laity, be it in teaching or participation in some phase of Catholic activities, each can be the instrument of God's Grace to move someone to make a greater sacrifice in embracing a religious vocation. God's ways are wondrous

As you advance in your high school education, aside from your achievements scholastically, there are goals and aims which you must pose for yourself. This takes ambition and determination. Above all, you must hold fast to your ideals. Each of you must hold firm to some set of values in life. Spiritually, nothing comes before the salvation of your immortal soul. Whatever vocation or avocation you seek for your happiness in life, it is to be an instrument and ne a hinderance to your salvation.

Let us pray that those of you who may be considering a calling to the religious life, will be given the courage to heed the Grace of God. Consult with your counselors and confessors for guidance and direction. Frequent the Socraments. Prov. These are the channels of God's Graces.

God bless you.

Yours in Christ. REV. MARTIN J. O'NEILL, O.S.A.

### Seek Individual Excellence

Well, here we are back in the "Old Salt Mines" again, and ready to place brough snother year of drudgery.

This has been the thought of many a middle student-just to get through another nine manths with their heads above water, just to keep their to, order strangeon. parents satisfied and willing to let them use the family ear, or just to ramp from vacation to vacation as a member of the Miserable C Scotters Club Looking upon their teachers as if they could them an education, and charge ing select rules only because of impending jug, they slide through each your with a minimum of effort

The real reason for crienting Mandel is, of course, to prepare dues altedring alone is the key to statems, but rather a combination of so erties, and sports together with the corresponds will yield a well rounded selucation.

Mondel does not eve sayone anything. What a stadent gains from his four years here depends largely upon what he guts into it. Our school may not have the test chairs and lockers, nor the most elaborate are falls recess on do some of the new public institutions in Chicago. What it has for surpasses these schools, for Mondel not only trains the crimibet also the soul and character of its stadents.

Whether this is your first or fourth year been, you now have a challenge. to meet, a burdle to jump.

THE SOLVING OF A PROBLEM Ma deader there are some completely assets, minded students in un-

od who are very much interested in the baseball games and especthe Warld Series coming up in the near fature. However, no death there are some of these same people who weathful miss the college football games or the Merckel Societic summer than fall on the same due as the breefall frace.

Being of sound mind and with a clear sense of ceason, or rollier, being of month mind . . . well arowsy, a certain member of the Mendellan, to whom we shall seles as Alvin too connection whatesever with the shipmank same time. Here then is his own account of this unforgetable day in history. scene is Gately Stadium, the characters are our hern and a portable radia of doubthd reputation.

We recieved the opening kink-off and ran it back to the 33-yard line. at which point an exceed World Series spowd roared in appreciation as third smring opened with a slashing double to left. Then with two six on the better, our fullback worst through goard for three yants. We fullowed this with an eight yard pass good for a first down-which found the wisting team to bring in a new pitcher, a left-hander.

He got the first two men on only grounders, and was forced to pand Now the home team took the field, and the righters started teding off—a single, a triple, a coverse off left tacklef or 17 yards, and a 265 foot homer clearing the bases, and having us trailing with two minutes to go in the first quarter.

halve when our second busyons returned the following kick-off for 182 yeard teachdown. And still better when the hume team west about 7-6 on protty a squeeze play as has ever been seen sixto Ty Cobb broke up the 1922 Harverd-Yale game. ### HOMECOMING SPIRIT

Another Mendel homecoming weekend is history. Because everyone contributed to its success, it will long be remembered when present Mendel students are numbered among our alumni. This makes a school outstanding - when the alumni think back upon their alma mater with food memories and appreciation, recalling the efforts made to give them a sound education and good social development. Homecoming weekend intends to keep this apprecation alive. It evelops into a tradition.

Most people would probably look upon a tradition as Fakovits, Joseph R. Parkinskis, George I. Parkinskis, John I. something built up over a long period of time. If, however, they were to be present at the ceremonies of a Mendel home-Peterson, Frank K. coming, they would not be slightly surprised to see such deepseated traditions in an institution so young. The traditions of Mendel have been created by the spirit of the classes which we have just finished honoring. It is up to us, the present Men of Mendel, to follow the example of these men and to keep our rich legacy of tradition and spirit alive.

### MAN VS. MACHINE

Automation is a word familiar to everyone, and is reported as a wonder of modern civilization. However, automation is a problem to millions of Americans. It seems that in seaching for the golden apple we have opened Pandora's box of troubles. For in the midst of all the increased production, high efficiency and lower costs that automation brings, we are creating poverty and degradation along with increased wealth. The poverty and degradation is that of the man who was repisced by a machine, and who can look to a foreboding future of little or no employment.

The problem can be simply stated by an example. In 1950 it took 26 men to produce a ten of steel. Now that same ten can be much by 13 men. What has hoppened to these men? Where is their productheiry? During the Recession of 1958 thomands of non-morkey some laid off. When production resumed, they could not take their place in the line. A reachine had filled that vacancy.

I am not against industrial progress, but the problem is acute. The problem is that society base's kept up with automation. Social progress is not abreast of industrial progress. We must close this gap, or he victims of our own progress. Machines don't consume what they produce, and the jobiess can't consume what machines produce either of life Those who say the victims of automotion can find jobs elsewhere are mistaken. A bugs, ever-increasing number of job applicants and a diministing supply of jobs due to automation are inconsistent with true conomic progress.

What do you say to a man who has performed his job efficiently for twenty years only to have his long sought security shattered by a piece of metal "more modern" than he? How do you tell a family prosider that he has been replaced by a tube? These men are not unemployed because they can no longer do their jobs. But rather they are unemployed because a machine was deemed more worthy than

One solution that has been offered is that of shortening the work week. L personally, do not know the correct solution. about 95% of us here started out with man a thoughts. Let's try and settle this thing right now by onshie ing three or four of your chief grievances against u. "add salls" and The Mendel Club took part to the sice that you'd be crary to be a seminarian.

FIRST THE HOLY JOE" IDEA

I suppose it is natural for you to think that we float around all day in the heights of prayer pau and every now and then to shine up our halos. I know that I - d this idea or at least something like it before signing up as I can't hold Club collected a total of \$170 this against you. Sure we spend something like three hours a day in chapel—does that make us raints? I only wish that a the Ecseland Community Members covered a total of 22 blocks going did Look at yourselves, if you go to Mass in the morning and drop into chapel once or twice during the cay for a visit that's an hour or more right there. Does it mak eyes a saint' I hope that it will, but right now ... well, what do you think About this 'holiness bit'-let's look at it from another

angle Whether you like it or not you're going o die just as sure as I am or every one of your tenthers in in the meantime you've got one of three ways to up ad your life-Married, Single, or Religious, You've got only ne choice and the one you choose is going to be the chief mans of getting you to heaven. Yes, we've all got eternity ahe did us -that's a long time! But because we all want to go to beaven does eventually priests to get there? Of course no Can you imagine what would happen if everyone who wented to go to braven were a magicus—there wouldn't be too many people around very lung! With regard to this beaven idea: if you're sure that the married state is your best bet to get you thereby all meets get married. On the other hand if you're not

sure-you might give us a try in the meantime So much for the HOLY JOE idea. Let's look at another these things we all did. one of your ideas about us:

### SECOND "THE BOY GENIUS" IDEA

heard that we have to study Philosophy and Theology, which are from you-let's look back over our 'Four Ideas' I guess that this idea urises mainly because you have probably sound like the world's two hardest subjects to you. won't kid you-they are bard but they're NOT IMPOSSI-BLE. You manage to survive Latin, trig, or English don't you? Well, we manage to survive philosophy and theology.

YEAR YOU LISTEN HEREH Let's get this to green You aren't a boy group in Latin or trig, are you? Well, tled once and for all! We seminarians are getting the and neither are we when a somes to philosophy and theology tired of hearing the same thing they after day from the guys. I guarantee you that if you are able to get past Latin or the What am I talking about You know darn will who am talk other subjects with average marks—that is with a "C"—then

We've still got a couple of your grapes about us to go, so let's do this one next THIRD THE SEMIN, RIAN IS NOT AN A "HLETE" IDEA

This idea probably comes about becay e you think, as since did, that we spend more time in charse than we do in

the gym. The fact is that we probably spend core time in the gym or playing baseball, cothall, etc. cara day than you mya do. Now you're probably saying, "I a deal, so they play lot of ball each day. What kind of hall do they play?" Perhaps an example will show you. Last year against teams from Mundelein, St. Rits, the previously undefeated winners of the local Men's League and the like we compiled a seven win and one loss record. Does this mean that every seminarian has to be another Bob Cousy! Of course not! Is every Mendel Man another Bob Cousy? . . . just look around you. On the other hand is every seminarian the guy who poses for the 'hefore' shot in the Charles Atlas ads? Again, of course not!

Well, so far we've covered the Holy Joe Idea, the Boy Genius Idea, and the Athlete Idea. I hope you see by now that if you're average in the first two, like most of us, and at least know what a baseball looks like (or are able to throw it a mile) you're certainly able to fit in here. Let's tackle one

Balonsyll Can't you guys see that we are the same type of guy you are-that we went out with the girls, went to the dances and prems, had our pin-striped cars. We were members of Fr. O'Rourke's Space Cadets or we manicured Fr. La Morte's grass in the afternoon. I'm not the only who did

O.K., you say, maybe these guys did do the same things we're doing now-so what? They're certainly a beck of a lot different than we are now. To see how much 'different' we

# WHAT'ST LIKE?

The seminarian inevitably goes to his room for some studying.

Some studying is in-classly the minimum and he usually heads for the Recreation Room for pinochie, conversation, etc.

Some weekend nights we sit in silent awe before the overpowering spell of the one-eyed monster.

What's it like? This is expat you are going to ask yourself when you are trying to what you want to be in life. Whether you want to have my career, be an architect, or a bricklayer you are naturally to ask, "What's it like?" You will find out what your eleoccupation is really like only when you try it out and sequeself.

Now if you want to find if you have the slightest desire to know about our way of lifest way to do so is to try it out and see. That is, actually gony for a while. This is the best and most satisfactory way. It way to avoid indecision or regret later on in life.

Maybe you are not sure this 'attempt' at something so entirely new. So what?—news anyone of us here now. We all had the Holy Joe Idea or other like Idea. In fact, you may still have these Ideas. Why sheast give us a try and see for yourself?

If you are like many of a, you probably have some particular questions which you white answered or perhaps you would like some more inform about being an Augustinian seminarian. Why not ask one priests about this? On the other hand if you don't 'feel' like aspe of the priests and would like to ask one of us who just threar years ago was in your shoes, please feel free to get in touth anyone of us. If you like you can drop a line or two to me all try to answer you as quickly and as clearly as possible.

My dear Students:

One of the outstanding features of the MENDELIAN is its annual issue dedicated to vocations. I would like to congratulate the moderator of the MENDELIAN, Father Nash. and his staff for this year's issue on vocations.

It is complimentary to a high school student body that there is fostered among you such vital interest in the lifeline of the church; namely, its vocations. This indeed is Catholic Action, where the talents of youth are weighed seriously in the balance of eternal values. Your being taught to evaluate yourselves in the light of eternal destiny, engonders just

pride in the calibre of a Mendel Man. It is not sufficient for a student to be trained in the arts and sciences as an end in themselves. The pursuit of these studies should be so intensified that the student realizes them to be a means to an end. The end of man is his eternal destiny. The salvation of his immertal soul is the "why" of his existence. Such material means as knowledge, learning, and experience are at the disposal of man and should be used toward the achievement of that end. Your catechism tells you that as creatures of God we were made "to know, love, and serve God." For this end you came into existence.

To serve God means that we live a life which is in accordance with his commandments. This is commanded of all Christians. Over and above the commandments we have His precepts. Christ urges us to follow these if we want our lives to be of "service" to Him. A life that is dedicated to the "service" of God reaches out to embrace His precepts; to practime His virtue for the greater love of God and for His Honor and Glory. A vocation to the religious life is one which calls for the imitation of Christ in all of His teachings-in a word, to be His disciple, His follower, His imitator.

I pray that the Holy Ghost will give grace and courage to those contemplating to undertake the self-sacrifics of walking in the footsteps of Christ. Let all of you pray for each other, the, in the pursuit of your studies such may realize God's plane in his chosen vocation. May God biese you.

OUTLOOK !

### For Seniors Only

Well, it's that time again, Graduation time. For three years you watched as three classes left Mendel. Now it's your turn. Some of you are happy it's over. Others are sad.

Some of you probably regard your graduation as an event of joyful escape from four years of drudgery and hardship. But to those of you who take the time to think about it, I'm sure this graduation means something far different than

Look nock on these past years. Have they really been so hard, so utterly hereft at 200? Think, and you will find it is quite the contrary. In fact, you will never be happier, more carefree in your life than you have been during school. Any adult will tell you that, and they should know.

Speaking of adults, you all are now approaching adulthood, both mentally and physically. Maybe you are adults already. Again, look back. See how Mendel has helped you mature. That is the purpost of the school-to take what is mentally and physically a boy and to help mold him into a mental and physical man. Notice I said help. Mendel could do only so much. The rest was up to you.

then again, if you look at it in the right way, graduntion should be a time of joy. Now you are free, on your own, ready to meet the challenge held by life on earth. But again, think. Who helped make you ready? The answer is obvious. How ill-prepared you would be to face the world if it were not for Mendel.

Finally, some advice. In future years, there won't be anyone to pester you to go to Mass, go to confession, go to more charge to prove repail, by Communion, and do all the things a good Catholic should do. You must not become lax in your faith because no one is there to push you into it. The most important single objective seetse, damp possages, easy offi there to push you into it. The most important single objective seeds, camp possage, easy unof your life is the saving of your immortal smil. Keep that

### LINES FROM THE LIBRARY

### Library No Sanctuary

The approach of somewhat indepent weather has forced as unusual member of intellectuals to seek out a copy corner where the remaliting moments of the basch period can be wiled away. The library has become one suck every corner. This sudden interest in the printed mass has created a problem of scene ness.

Our present quarters accommodate approximately severy-five and we are more than happy to see all the seats occupied by students engerly going about their research and collateral reading. However, we find that some have been making the library a sanctuary for studying from textbooks, doing hornework, writing private "assignments", and what notall work which should be done at home

To make our position quite hacid. The library is intended primarily for those who wish to use the materials there. During the banch regions our facilities are occurred to capacity with those who are actually using the library books. Thes certainly have profesoror; those who work from their textbooks must be excluded not from choice but from necessity Hence, the recent sign on the library door NO TEXTBOOKS DURING LUNCH PERIODS

#### WHAT KIND OF PREPARATION?

Take a look at what an Augustinien Priest has to be, and we will ore that Stid of preparation is necessary in this is the seminary. Acquairtance are primarily high school and college teachers, but also parent Prime, and Mesonaries to forcige lards. The Augustinian has in most the challenge of modern life on every level; as a possib Prisest behas to deal with people of all walks of the help them with their prob lette, beig there to nave their souls. He has to meet and conserse with people of all levers of acciety, from millianairs industrialists to has driven from bankous to faring workers. As a tracher he has to made youth to use their God-given talents and in prepare them to meet the challenge of modern life. As a missionary be has to have complete command of canomied to our way of life.

So you can see that a lot of ground has to be revered in the assuinger man for the Augustinian Priesthood; how such things as prayer, study,

THE SECOND PHASE You're off the ground for one year after high school in preparation as an Augustinian religious at Oconomowoc, Wincomin, 30 miles west of Milwarkee.

#### THE THIRD PHASE

The count-down really starts with your college training at Tolorine Hall,

The Appedising Monthern work and celes in the case reference life or the

perkents.

And now, hast three years later, I am an Augustinian seminarian my way to the priesthood, enjoying a wonderful and meaningful life here at Thierstine, and I thank God every time I think of my days at Mendel and how his grace brought me here. If I had only known than

one day I might be one of the Augustinian pricess where life and spirit add so much to Mendel. God has called me, at least 1900 far-ula the

MENNY.

Dear Mr. M. at 19631 "Who ME? ME be a priest?! That's ridiculous!" That was my first increasion when the priest I had been talking with asked me if I had ever thought about the priesthood. I still don't know why my first impulse was to dear it even though I had often thurself about the priesthood but deny it I did. Maybe it was because I thought my friends would laugh at me if they knew I had idean about being a priest, maybe thought I wasn't good enough-maybe it was because I didn't have the

rage to admit to revest that Got might want me. That was during my suphomore year at Mendel. I guess I was a typical sopheraces: I weser't impressing anyone with my scholastic achievements, I was starting to date, and Dad was becoming more lentert with the family cat in short, life was treating me pretty well. And as a typical sophesses. I wasn't thinking seriously about anything least of all, my future life. I had thought about being a priest in grammer school and every during my years at Mendel, but never very seriously.

I think that almost every Catholic boy has felt an attraction to the exthood at some time or other in his life, either through an admiration or some priest or an attraction to the priestly dignity. By this attraction, don't mean that the Boly Spirit comes down and whispers in a follow's ear. I mean an attraction like a boy would feel to follow in his father's line of work. If this is true, I was not an exception, Maybe it was my serving mass or singleg in my parish choir that fostered this attraction in me, I really don't know, but the attraction was greatly murished during my days at Mondal.

I can't exactly par my finger on the reason why I first thought putots have a constinue to the retestional while I was a student or Mandel. but I'm sure it had a lot to do with the example of the very Augustinian prints with when you rule ellows each day. There is no street that passesses a spirit quite like Mendel's and this oft peaked spirit originates and is exemplified in the lives of year Augustinian teachers. The spirit of communicating and boothsthood, the spirit of con hundred per a mi effort. win or loose, thin is the spirit of Mendel and this is the very war of life of the prints at Mendel and of all Augustinians. All these things were nourishing a vocation to the principled in me but I didn't staline it until now seeing year when a little come disturbly gave more capacity ... think

Then the day finally come wise I realized I had to make some decision about my future, and only then did I meanier up caregis occurries to consult a priori whom I had gotton to come quite well about the posabbility of my having a sell to be a prior, He advised me that I might have a vecation but this in my way conversed me. I still had a measured and one questions which needed to be accovered, such as what was the accelerate like? What exactly is the life of a seminarian? and cost important, what are seminurians like? I found the answer to there and many other questions when at the suggestion of this prest, I looked over servinary life first hand during a three day retreat | made will I new the leader of a seesinary and almost lived its life and I methods tractions and talked with them and was very impressed by their friend linest and manifested I then knew that I had nothing to loose by trying out this life and everything to gate.

The dictionary defines resemble in these words: profound respect. mingled with love and awe, Among God's chosen people, it has always been said to the True Supresse Being. We find proof for the fact in the Matury of the Habrews in the Oto Testament and in the history of the Christians in the New Testament. God demanded recovered and man received it. One instance may suffice to bring out the point. When Meson was called by God to lead his people out of Egypt, the Lord appeared to him in the form of a burning bush. When Moore and the bush burning, he began to approach it to see why it was not consumed by fire. A votor from the bash commanded him not to come any farther and to of 30 of the city's 48 public high take off his shows because the ground he was realiting so was body ground. Home introcliately obeyed the voice and sensored his slows and appropriated the bush with both awe and four. It was then that the Lord revealed Simesid to Moses and told him what role he was to play In leading the shower people out of Egypt. The point here is that Moons extitude, showed according to the place and the ground which he was tall was

#### CHRISTMAS GREETINGS FROM AUGUSTINIAN - PROVINCIAL AND RECTOR

From the Provincial of the Mid-West

With the bestifying lerves of fragody still ranging in our ears from the Barrot Schraust at a Catholic percettal school, we approach the Holy Season of Christman with solar private and sinced selled hearts. This pretive. "You have not here a leading city, leaf seek ye conthat is to come." From the regule that periabed in the flavors of this fire, we sak interconnect with Good in our behalf. For the grief stricken passible,
